FEATURES THAT AFFECT APPLIES ON INDEED.COM

WILLIAM DAVIS, COREY ROBINSON, STEVEN PESINA, MELINDA CUNDIFF

YELLOW TEAM AKA "BARELY SCRAPIN' BY"

PROCEDURE

- Scraped mean salary data from Indeed.com by job title.

- Retrieved population data by city from census.gov.

- Ran model in R of Applies as Population and Salary.

- Goal to test and observe if a linear relationship exists.

- $H_0: \beta_1 = \beta_2 = 0$

- $H_A: At\ least\ one\ of\ \beta_i \neq 0$

RESULTS

- The model is not statistically useful for determining the number of applies.

- Population and Salary are not useful predictors for the number of applies
